DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/23/03 has been entered.

Election/Restrictions

2. This application contains claim 3, drawn to an invention nonelected without traverse in Paper No. 5, an still withdrawn from consideration.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 1, 2 and 4-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Machida et al. for reasons cited in the previous Office action.

Response to Arguments

5. Applicant's arguments filed 7/23/03 have been fully considered but they are not persuasive.

6. While applicant has amended the claims to now specify that the polarity referred to in the claims is measured in water, since the polarity of a given material is a constant, the prior art teaching of the compounds each having the same polarity still meets the requirements of the claim. If the material have the same polarity, then they have the same polarity in water.

7. Also, the fact that the prior may or may not use a petroleum liquid disperser is irrelevant to the rejected claims. The polarity of the materials in water is that same, regardless of the particular recording liquid Machida et al. has chosen.
